IEEE Systems Council
Technical Committee on Security and Privacy in Complex Systems
Online Meeting – 11/12/2015, from 8:30am to 9:30am US Eastern Time

Organizer: Shiyan Hu, shiyanhu@stanford.edu
Participants: Roger Oliva, Shiyan Hu, Logan Mailloux, Radu Babiceanu

In this meeting, we continued the discussion about how this TC can contribute to IEEE SysCon 2016, and how this TC can contribute to IEEE SYSC newsletter. The details are as follows.

- Shiyan and Logan have received positive feedbacks about their proposed tutorials to IEEE SysCon 2016. Remzi will submit the panel proposal to the conference. TC meeting will be located after 4pm during the conference. The exact date will be determined later through discussion with the conference organizers. In that TC meeting, some slides will be shown to publicize this TC including scope, mission, memberships, achieved activities and ongoing activities. This publidy available TC meeting is a good outreach activity and new TC members should be sought as well.

- Roger will help set up contact with IEEE Transportation Standards committee and we will discuss with them to see how this TC can participate in this joint activity.

- The submission deadline for IEEE SYSC newsletter is November 27. Shiyan will start a thread including some bullets for the general announcement of the TC (e.g., its scope, mission and contact information). Other TC members will keep adding new items to this list. For example, the confirmed IEEE SysCon activities from this TC should be included there. The compiled list will be submitted to the newsletter by the deadline.

- Roger has shared the TC his experience with policy development teams. He wishes to create a product as follows. Advises IEEE/USA with policy recommendations associated with security, safety, and privacy concerns in today's electronics and produce succinct documentation to alert engineers to potential future issues in subject concerns.

- The next meeting will be on December 10. Interested non-TC members are welcome to contact the TC chair Shiyan Hu at shiyanhu@stanford.edu about how to participate in this meeting.
